

# Mortars

---

## Mortar Product Line

Reno Refractories, Inc. produces a wide range of wet and dry refractory mortars and patches from 90% silica to 95% alumina. Bond systems include airset, heat set, and phosphate bonding. These products have good strengths and can be used in metal contact areas. Our mortars are used for laying alumina brick and a protective brush coating on existing refractories.

## Key Features

- Shipped wet, ready to use
- Shipped dry, customer can wet to preferred consistency
